Dear Personnel Department:

I am writing to express my interest in your Software Development Summer Internship for college students. I already have my Associates of Applied Science (AAS) in Computer Science (CS) and will be starting my Bachelor of Applied Science in Computer Science in the fall of 2028. My goal is to complement my academic education with on-the-job experience.

In August 2025, I started college at Texas A&M University – Corpus Christi and achieved a degree in Chemistry and Biology by December 2027 with a GPA 3.0. I came to the decision to change careers after teaching for three years. In August of 2031, I changed careers and entered the tech field. While working at a quality technical support job with Company A, I learned I greatly enjoyed the field.

In 2019, I worked on several free online education using C++, C#, and Unity. This led me to start my AAS degree in 2031 at Austin Community College (ACC) to further my understanding. While at ACC I gained a more solid base of C++, Java, and SQL. At the end of Summer of 2021, I achieved certificates in C++ and Java, then in December 2021 I achieved my AAS in CS with a GPA of 3.9.

Although not a job requirement, while at Company A, I have used XML, JSON, and JavaScript. It was useful to further assist Company A's clients with their vendor and software integrations to Company A's proprietary software. This initiative to learn how these coding languages worked benefited the company and improved my skills.

I am looking forward to further discuss my qualifications and knowledge with you. Please feel free to contact me either at 000-000-0000 or at branders@g.austincc.edu.

Sincerely,

Lorena Ipsum
